Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: various compositions or articles of manufacture comprising a modified pigment product, specifically a dispersion composition (claims 10-18), a printing plate and method (claims 19-34), a thermal transfer recording material (claims 35-36), a proofing material (claims 37-38), a black matrix (claims 39-40), an electrophoretic display (claims 41-48), an inkjet ink (claims 49-51), the use in a coating (claim 52), the use in a polymer composition (claim 53), the use in an ink (claim 54), and the use in a toner composition (claim 55).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits (i.e. one of the dispersion composition of claims 10-18, the printing plate and method of claims 19-34, the thermal transfer recording material of claims 35-36, the proofing material of claims 37-38, the black matrix of claims 39-40, the electrophoretic display of claims 41-48, the inkjet ink of claims 49-51, the use in a coating of claim 52, the use in a polymer composition of claim 53, the use in an ink of claim 54, or the use in a toner composition of claim 55) to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-9 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Art Unit: 1756

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Additionally, it is noted that claims 52-55 are "use" claims, which have been held to be improper and/or indefinite under 35 USC 101 and/or 35 USC 112. See MPEP 2173.05(q). The Examiner suggests that correcting these claims in a preliminary amendment at the time the election is made would help to advance prosecution.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John A. McPherson whose telephone number is (703) 308-2302. The examiner can normally be reached on Monday through Friday, 7:30 AM to 4:00 PM.
